

Successfully migrate to Veeva Vault

Life sciences functional areas often need to share regulated content for business operations while complying with FDA 21 CFR Part 11 and EU Annex 11 guidelines. migration-center ensures secure document migration to the Veeva Vault platform, including Vault eTMF, Vault Submissions, Vault QualityDocs, and more.

Migration-as-a-service

Our fme Life Sciences team supports customers with migration project services using our product migration-center – whether you only need support in a specific business area or require a full-service agreement to manage the entire project. Our team includes developers, project managers, migration specialists, and communication experts. Through our proven methodologies and best practices, we deliver high quality outcomes while focusing on cost optimization.

Data cleansing & metadata enhancement

With custom metadata transformation and mapping capabilities, integration with external information sources, or our artificial intelligence-based auto-classification modules, migration-center helps customers clean up and improve the quality of metadata. This leads to faster information retrieval and improved compliance. We also offer a tailored metadata cleansing and enhancement service element based on our proven methodology to increase information quality.

Onboarding to the Vault Industry Cloud

We enable our clients worldwide to master their digital transformation in order to remain competitive and to stay in business. With our Veeva-certified content migration software migration-center and our Migration Services for the life sciences industry, we provide an end-to-end offering to modernize your business application landscape and migrate data from legacy or outdated on-premises solutions to the Veeva Industry Cloud.

Supported source systems

- ✓ File share
- ✓ SQL Database
- ✓ Alfresco
- ✓ HCL Domino/Notes
- ✓ IBM FileNet IS/CS
- ✓ Microsoft OneDrive/Outlook/SharePoint
- ✓ OpenText eDOCS/Content Suite (xECM)/ Documentum (D2/xCP)
